Sub Category

Subject Product QA specifics for Release A

## Description of Problem or Suggestion:

During the data processing presentation it was explained that there is some QA done internally as part of the PGE execution and some QA done externally to the PGE at some later time, but specifics regarding what types of QA tasks done in either place were not provided.

## Originator's Recommendation

Provide specific descriptions of the QA/QC tasks and where they are being done for each data product in Release A.

GSFC Response by: Bob Lutz

GSFC Response Date 12/7/95

Discussions with LIS and CERES personnel have indicated that any external QA tasks (in other words QA functions not within the PGE software) will only be done at the SCF. Both instrument teams indicated that no external QA functions will be performed at the DAACs processing the data (Langley and Marshall). CERES will be submitting Draft QA Plans (for the AM platform) to the Project in June 1996. LIS has also indicated that they may wish to submit QA Plans at that time also, though they are not formally obligated to do so for the TRMM instrument.
